

Environmental and Sustainability Policy

Advanced Vehicle Assemblies (AVA) environmental and sustainability management is governed under the following policy and principles:

Commitment

- Protect a sustainable environment and prevent pollution.
- Use energy and water in an environmentally responsible manner.
- Provide necessary resources to achieve environmental sustainability objectives.
- Achieve sustainability objectives to control the environmental impacts of AVA operations.

Compliance

- Meet applicable legal requirements and compliance obligations.

Continuous Improvement

- Continual improvement of environmental management system.
- Integrate sustainability programs to reduce the carbon footprint.
- Share best practices.
- Support operations to achieve environmental program goals and meet customer requirements.
